

Uploading to the Server using CoreFTP

SETTING UP CORE FTP

1. Download and install CoreFTP (link on Resources page of class website)

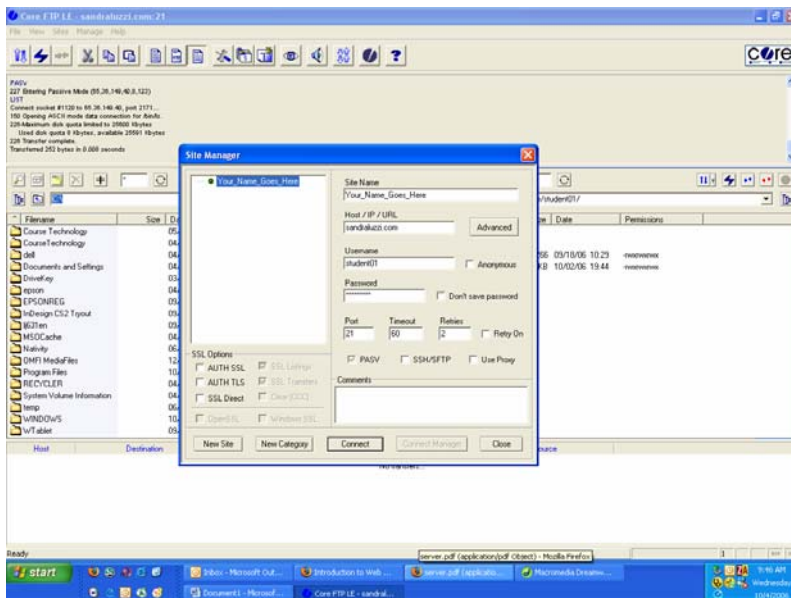

2. Enter settings:

Site Name: your name

HOST/IP/URL: sandraluzzi.com

USERNAME: studentXX

PASSWORD: studentXX

3. Click CONNECT

The left side of the screen represents the local machine (your computer) and the right side of the screen represents the remote machine (web server).

UPLOADING FILES

1. Click on filename in left pane that you want to upload.
2. Click the right pointing blue arrow button above the left pane
